## NECKLACE SIZING GUIDE

### 37cm - Petite Choker Length:

Often suitable for a petite neckline and will sit just above the collarbone.

### 45cm - Standard/Princess Length:

Falling below the collarbone, the Princess length is a standard length for most necklaces. With its placement on the chest it accentuates the décolletage and complements a variety of necklines.

### 80cm - Opera Length:

Sitting below the bust, the Opera length creates a statement look. Typical length of our Tassel designs. With the added length, it can be worn as a single long strand or doubled up as a shorter necklace.

### 40cm - Choker Length:

Will typically sit to the centre of the collarbone making it a great length to showcase delicate pieces.

For a layered look, one at 40cm and another at 45cm can create a range of play.

### 50cm to 60cm - Matinee Length:

The Matinee length sitting below most necklines provides play to a plunge neckline or piece designed for evening wear.

### 110cm - Rope Length:

Falling just above the belly-button region, the Rope look provides an impactful presence. At this length it can easily be doubled over to create either a choker look or layered into a Matinee length.
